The benefits of clean water in Limuru will influence the daily lives of thousands of children and adults, eliminating waterborne diseases and impacting the quality of life in the community for generations to come. A heartfelt thank you to all who supported this project.

“To live without clean water is wrong. Women walking for miles every day to fetch water, often with their children by their side or on their back, is wrong. To arrive at a muddy water hole that is shared with cattle is wrong. That’s why we feel so passionate about providing clean water to communities in need. Being present at the dedication, was surreal. A very joyful moment.” — Nancy

A far off place, it could be anywhere, And what is too common, does anyone care? People thirsting for water, there’s no greater need, Will someone take notice, will someone take heed? A small group of women and one young man, Showed their concern, and thought of a plan. Fifty thousand dollars had to be raised, A daunting amount, but God would amaze. He began touching hearts to complete His endeavour, Knowing full well it would not take forever. The dollars came in from many a soul, They soon had enough to begin the borehole. One week the rig drilled, the borehole complete, And all rejoiced at this incredible feat. We gathered as one from far and from near, And shared together many a tear. There was drumming and dancing and singing galore, A beautiful scene that made every heart soar. This pure clean water from deep in the earth, A sweet gift of life of no greater worth. For generations to come this water will flow, Helping so many, numbers we’ll never know. A dream fulfilled, made possible by love, Orchestrated by Him, who reigns from above.

A DREAM FULFILLED

The people of Limuru, Kenya, are celebrating!

**THEY FINALLY HAVE ACCESS**

**TO A SOURCE OF CLEAN WATER!**

Limuru’s new borehole pumps 5,000 to 8,000 cubic meters of water per hour; an ample supply to meet the needs of the entire community. Families will no longer have to buy water from unsterile water tanks, or walk for miles to get water from unclean sources. On March 18th, 2018, it seemed like the entire community, including many sponsored children, came out to celebrate the dedication of the new borehole. Women sang and danced with great joy. A borehole in their community will eliminate many hours of walking to fetch water. The time spent fetching water represents a cost to their health, productivity, and in many cases, educational opportunities—a burden borne disproportionately by women and girls.

“It was a beautiful thing to watch the women sing and dance around praising God for giving them clean water nearer to their homes. My heart is full!” • Jocelyn Muraya, Director

OVER 3,000
**WOMEN** NOW
HAVE CLEAN WATER

6,000 - 8,000
**CHILDREN** NOW
HAVE SAFE WATER
“It was great to be able to see the project completed and to bring home some news and photos of the dedication for friends, family, and clients who gave generously towards this project.” • Jared

Nancy Bolton of WMAD, Donna Michalek, and Jared Steeve were thrilled to see the impact of their 3 years of fundraising.

Jared Steeves, a businessman from New Brunswick, got on board and had the privilege of seeing Limuru’s children drink safe water for the first time.

God knew that the people of Limuru needed clean water. After going to Kenya in 2015 on a Discovery Tour, I asked the Lord how I could help, and the idea of the book came into my mind. I’m not a writer but God helped me and many people bought the book! God did it!” • Donna

Donna Michalek wrote a children’s book called “Water Boy” specifically for the purpose of raising funds for Limuru’s water project.

“God knew that the people of Limuru needed clean water. After going to Kenya in 2015 on a Discovery Tour, I asked the Lord how I could help, and the idea of the book came into my mind. I’m not a writer but God helped me and many people bought the book! God did it!”
